Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on November 20th, 2000. It is noted, however, that applicant has not filed a certified copy of the 352454/2000 application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicants disclosure.

Prior art 1 disclosed by applicant teaches, a magnetic core [15] with at least one gap, an excitation coil [19] disposed on said core, permanent magnets [23] disposed near the gap. It fails to teach the use of soft magnetic material. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a soft magnetic material piece to improve the strength/efficiency of the permanent magnet. It is known in the art that soft magnetic material efficiently conducts flux and losses less eddy current when compared to other magnetic material of the same size.

Regarding claim 3, the gap is formed of one U-shaped magnetic core [figure 1A].

Art Unit: 2832

Regarding claim 6, applicant discloses the inductor components use as a choke coil.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicants disclosure in view of Cuk.

Regarding claim 4, applicants disclosure discloses the instant invention with the exception of having a pair of coil forming a plurality of gaps.

Cuk teaches the use of a pair of C-shape cores to create a plurality of gaps [figure 9a].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the two teachings to create a more powerful choke coil.

Regarding claim 5, the gaps are formed on each abutting edge face of the C-shape cores [figure 9a].

Allowable Subject Matter

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or suggest a second layer of soft magnetic material.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Fukui et al. disclose the general state of the art in choke coils.
- SUGAWARA discloses a common choke coil with a two core structure.
